

## Create an Eclipse Plug-In with a Multi-Page Editor

1. Select File → New → Project... from the menu
2. Select Plug-In Development -> Plug-In Project
3. Enter MPE\_Editor as the project name
4. Navigate to 'Templates' page of the wizard (Next button twice)
5. Select 'Plug-in with a multi-page editor' -> Next
6. Fill the name of the editor like below : MPE Editor -> Next

7. Fill the name of the wizard (replace sample with MPE in all places)
8. Finish
  - ⇒ Project is created in Package Explorer view
9. Explore the generated code with focus on:  
`IResourceChangeListener`  
`MultiPageEditorContributor.createActions`  
class MPENewWizard extends Wizard implements INewWizard
