

Create an Eclipse Plug-In with a Pop-Up Menu

Select File → New → Project from the menu

1. Select Plug-In Development -> Plug-In Project
2. Enter PopupMenu as the project name
3. Navigate to 'Templates' page of the wizard (Next button twice)
4. Select 'Plug-in with a popup menu' -> Next
5. Fill the name of the sub menu and of the action label like below

6. Finish
 - ⇒ Project is created in Package Explorer view
7. Take a look at the generated code
8. Debug the plug-in as an Eclipse Application
9. Terminate debug session
10. Go to method run(IAction action) from OpenView class
11. Comment the message dialog
12. Add the code below for opening a view

```
PlatformUI.getWorkbench().getActiveWorkbenchWindow().getActivePage().showView("org.eclipse.egit.ui.RepositoriesView");
```
13. Debug again the project
14. Modify the code to open a different view
